

GENERAL PRACTICE RESIDENCY (GPR) PROSPECTUS FOR RESIDENT CYCLE 2019-2020

SPONSORED BY THE
CENTER FOR DENTAL EDUCATION
COLLEGE OF HEALTH PROFESSIONS
UNIVERSITY OF ARKANSAS FOR MEDICAL SCIENCES

1. BACKGROUND

The UAMS General Practice Residency (GPR) is a one year hospital-based program. Residents rotate at UAMS in Emergency Medicine, Otolaryngology and Anesthesia for two weeks in each department, and Oral Surgery at Arkansas Children's Hospital (ACH) for two weeks. Each resident participates in a rotation for two weeks each at Arkansas Children's Hospital to focus on Pediatric and Special Needs Dentistry. Residents will also spend eight days at the UAMS 12th Street Health and Wellness Center and one day at the Harmony Health Clinic.

The GPR program emphasizes **comprehensive general dentistry on patients with complex medical histories**. At the successful completion of the GPR program, each resident will receive a certificate of completion.

2. PURPOSE

The General Practice Residency (GPR) Program is a postdoctoral educational program designed to provide essential skills, attitudes, and abilities related to the contemporary practice of advanced general dentistry, with emphasis on total patient-centered care. The program provides the recent graduate the opportunity to augment his/her knowledge of oral disease and his/her diagnostic and therapeutic skills in dentistry. Treatment of oral disease in the medically complex patient and/or hospitalized patient is emphasized. A private practice environment is maintained throughout the program to assist the recent dental school graduate in the transition from academics to "real world dentistry."

3. GOALS

The overall programmatic goals are in accordance with the Standard 2-1 described by the Commission on Dental Accreditation, which state that the GPR residency will prepare the graduate to:

- Goal 1: Provide care for a variety of patients including special needs and the medically compromised
- Goal 2: Function effectively and efficiently in multiple health care environments within interdisciplinary health care teams in a hospital setting
- Goal 3: Increase knowledge and skill beyond the pre-doctoral level and enhance evidence-based decision making and foster lifelong learning into professional practice.

Goal 4: Understand the oral health needs of communities and engage in community service

4. RESIDENCY PROGRAM

Program Length:

The GPR Program, sponsored by the University of Arkansas for Medical Sciences consists of 12 months of advanced dental education in clinical dentistry and is conducted primarily within a hospital environment.

Program Dates:

The program begins June 17, 2019 and concludes June 30, 2020. In general, entering residents are **required** to report on this date for UAMS Hospital Orientation and to help in patient transition.

Assignments:

UAMS Oral Health Center – 7.5 months

Residents spend 7.5 months at the OHC where the majority of time is spent providing hands-on patient treatment. The 7.5 months is spread out during the entire year to assure continuity of care. During this time, residents gain a wide variety of experiences by providing complex dental treatment for both hospitalized and ambulatory patients. The concept of comprehensive care is stressed, with an emphasis on considering the "whole" patient. Opportunities exist for providing comprehensive dental care; including fixed and removable prosthodontics, implant placement and restoration, rotary endodontic therapy, periodontal therapy, oral surgery, advanced esthetic operative techniques, and dental clearance. Residents also gain extensive experience in evaluating hospital patients and providing dental consultations.

Oral Surgery – 2 Weeks

This rotation is designed for a two week rotation with our faculty oral surgeon initially, and a one week rotation at the end of the residency year. Each resident spends one on one time with the oral surgeon treating in the dental clinic at ACH. Residents will learn surgical procedures and familiarize themselves with third molar extractions, jaw resections, stabilizations, obturator construction and TMJ therapy. They will also participate in removal of cancerous tumors and cysts, assist the surgeon with biopsies, and participate in surgeries with the cleft palate team. Patients included are complex pediatric and adult patients, special needs patients, trauma, and OR cases.

Emergency Medicine – 2 weeks

During this two-week rotation, residents actively participate in the care of patients presenting to the UAMS Hospital Emergency Room and Walk-in-Clinic. UAMS serves as a Level 1 trauma center; thus residents are exposed to a wide variety of emergency medical situations, from sprained ankles to major trauma. The GPR residents are often assigned one-on-one with an Emergency Medicine physician to maximize their rotation.

Otolaryngology – 2 weeks

This two-week rotation is spent on service with the Department of Otolaryngology. The GPR resident will be primarily assigned to the head and neck cancer team. They will follow patients undergoing multidisciplinary management for head and neck cancer. Time will be spent in radiation oncology and medical oncology. Residents will observe and participate in numerous outpatient surgery procedures at the UAMS Otolaryngology clinic and operating rooms. Residents will participate in the care of hospitalized patients from admission to discharge. The GPR residents are required to participate in at least five operating room cases.

Anesthesia – 2 weeks

During this rotation, residents actively participate in the care of surgery patients via assignment to the Department of Anesthesiology at the UAMS Hospital. Residents receive experience in physical evaluation of the pre-anesthetic patient, starting and maintaining intravenous lines, oral and nasal intubation, monitoring vital signs, maintaining optimum airways, utilizing various equipment and instrumentation for monitoring the anesthetized patient, and patient recovery.

Pediatric Dentistry – 2 weeks

The GPR resident spends eight weeks at Arkansas Children's Hospital Dental Clinic. During this time, they perform both comprehensive and emergency treatment for pediatric and adult special needs dental inpatients and outpatients. Emphasis is placed upon prevention of oral disease in the child and adolescent, management of dental emergencies, and treatment of the phobic or disruptive patient via behavioral management, inhalation analgesia, or general anesthesia.

UAMS 12th Street Health & Wellness Center

The 12th Street clinic currently sees an underserved population, and the dental clinic will also see this same type of patient population. The residents will treat these dental patients and provide a much-needed service for the community.

Endodontics

An endodontic course is taught and supervised by a private practice endodontist in the oral health clinic. This course focuses on molar root canal therapy and consists of clinical instruction, incorporating the use of endodontic instrumentation, use of the microscope, and use of rotary endodontics.

Periodontics

This periodontal course is taught and supervised by our adjunct faculty dentists. This course provides didactic instruction and clinical training in periodontal procedures as needed for restorative treatment including crown lengthening, flap surgery, osseous surgery and grafting procedures.

Implant

The implant course is taught and supervised by our adjunct faculty dentists. This course provides training in implant placement and restoration, CBCT software with implant planning, and exposes resident to at least one surgically guided implant experience.

Didactics:

Formal postgraduate courses taken with other post-graduate students or residents include Physical Diagnosis, Techniques of Pain Control and Anesthesia, and Dental Management of the Medically Complex Patient. During the first five months, the Advanced Restorative Dentistry lecture series provides didactic content on applied pharmacology, restorative dentistry, fixed and removable prosthodontics, endodontics, implant surgery/restoration, and oral medicine. Each Friday, four hours is set aside for resident seminars that range from formal guest lectures to treatment planning (patient care) sessions. At these sessions, other issues are discussed relating to clinical practice management (scheduling, emergencies, etc.). Throughout the year, several practice management consultants are scheduled to discuss the transition into private practice. All GPR residents, including those on rotation, are required to attend these Friday sessions. Space permitting, continuing education courses offered by the UAMS Center for Dental Education are made available to the residents.

5. FACILITIES**UAMS Oral Health Clinic:**

The UAMS Oral Health Clinic is an 11 - operatory modern, spacious dental facility located in the UAMS Hospital; additionally, a separate surgical suite is maintained for anesthesia-assisted cases. The operatories have fiber optic capability, digital radiography, nitrous oxide delivery units, and an integrated electronic patient record system. There are three front-office staff, eight dental assistants and two hygienists assigned to the GPR clinic full-time. Inpatient and outpatient needs are readily served by the clinic's convenient location. Convenient parking for patients and residents is available.

University Hospital:

The University of Arkansas for Medical Sciences Hospital is a Level 1 trauma center and major teaching and service facility with a capacity of 450 beds. This well-respected tertiary care hospital serves patients regionally, nationally, and internationally. It is particularly well known for clinical care and research relating to cardiac surgery, cancer therapy, organ transplantation, and geriatrics. The University Hospital is consistently ranked as one of the best health science center hospitals in the United States.

Arkansas Children's Hospital:

Arkansas Children's Hospital, as a private nonprofit institution, is the only pediatric medical center in the state and is one of largest in the nation. With 316 staffed beds, ACH is a Level 1 tertiary care regional referral center treating children from birth to age 21. Patients come from every county in Arkansas and many nearby states; the hospital hosts the only Burn Center in the state. A new and expanded Children's Hospital Dental Clinic was recently opened. A full spectrum of dental services is provided for medically compromised and healthy pediatric patients.

6. CALL

Residents currently do not participate in after-hours call throughout the year, however, residents are required to live within 30 minutes of UAMS Hospital in case they are needed for emergency management.

7. APPLICATION PROCESS

General:

Selection of the residents is based on the following criteria:

- Class standing, GPA and National Boards Part I
- Letters of recommendation
- Applicant essay
- Interview

The GPR Admissions Committee is comprised of full-time faculty and part-time faculty. Applicants must be a graduate of a fully-accredited, four year, North American dental school. Successful completion of the National Boards Part 1 is required. *Arkansas state licensure is required for admission, but can be obtained once admitted to the program.* All application forms must be received by October 1, for admission in 2020.

PASS Application:

Beginning with the 2016 entering class, participation in the PASS application program is **mandatory** for all applicants. Application materials can be accessed through the PASS website: <http://www.adea.org/passapp/>

UAMS Equal Education Opportunity:

As an institution of higher education and in the spirit of its policies of equal employment opportunity, UAMS hereby reaffirms its policy of equal educational opportunity. All applicants for admission will be considered without regard to an applicant's race, color, sex, sexual orientation, age, natural origin, disability unrelated to program performance, disabled veteran status, or Vietnam-era veteran status.

8. FINANCIAL INFORMATION

Stipend:

Each resident of the General Practice Residency Program receives stipend support as determined yearly by the administration of the University Hospital. The stipend compares favorably with those of other programs. Specific information is available from the program director. The first year stipend is approximately \$51,289 a year plus benefits.

Moonlighting:

For all first year residents, the residency is to be a full-time endeavor. The after-hours practice of dentistry will not be permitted.

9. HEALTH POLICIES

All newly appointed residents must undergo a pre-employment physical examination and will be tested for tuberculosis at no cost by UAMS Employee Health within the first month of arrival. All newly appointed residents are also screened for immunization of hepatitis-B and childhood diseases as part of the physical.

10. DISCLAIMER

The contents of this prospectus represent the most current information available at the

time of publication. It is possible that changes may be made with respect to this information without prior notice. Thus, the provisions of this prospectus are not to be regarded as an irrevocable contract between the school and the student.
